Professional Summary

Software Engineer specializing in modern frontend architectures and scalable backend systems. Proven ability to build highly interactive user interfaces and robust, production-grade web applications. Hands-on experience with AI-powered systems, RAG pipelines, and end-to-end deployment, aiming to deliver efficient software solutions for top-tier tech environments.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, HTML5, CSS3
- **Frontend:** React.js, Next.js, React Native, Redux, Redux Toolkit, Three.js, GSAP
- **Backend:** Django, Django REST Framework, Flask, FastAPI
- **Databases:** SQL, MySQL, PostgreSQL, SQLite
- **Infrastructure & Tools:** Git, DevOps Core, Computer Networking, Linux VPS Deployment, SSL, AI Automation, RAG (Retrieval-Augmented Generation)

Projects

Lingua-app (AI Language Learning App)

React Native, Expo, AI Integration

- Built an interactive, AI-powered language learning app offering bite-sized lessons, quizzes, and real-time AI feedback.
- Designed a mobile-first experience using React Native and Expo, modeled after leading language-learning platforms.
- Integrated AI feedback loops to give learners instant, personalized correction during practice sessions.

CoolBraze-AI (AI Customer Support System)

Django, Claude API, RAG

- Built a full AI-powered customer support system where three autonomous agents collaborate to handle customer queries end to end.
- Implemented RAG-based document search so agents could pull answers directly from real company policies and documentation.
- Engineered agent logic to make refund decisions and detect fraud automatically, with all activity streamed live to a monitoring dashboard.

ClickMart (Full-Stack E-Commerce Platform)

Django REST Framework, React 19, Linux VPS

- Built a production-ready e-commerce application with a decoupled architecture: DRF backend and a React 19 single-page front-end.
- Deployed the full stack to a Linux VPS with SSL, taking the project from local development to a live, secured production environment.
- Designed the system to demonstrate complete end-to-end engineering, from data modeling to production deployment.

Education

Master's Degree in Islamic Studies

Expected 2027

Currently Pursuing

Bachelor's Degree in Islamic Studies

Completed 2025

Graduated
